Job Type:	Full time, Salaried, Exempt

At Solvus Global, We Are...

Innovators, Engineers, Entrepreneurs, Makers, Creators, Dreamers, DOERS

Solvus Global is a technology innovation company focused on solving problems in the materials and manufacturing space. We are a diverse team of engineers & scientists dedicated to leveraging our Knowledge Capital to develop critical solutions for our customers. Often, those solutions have much greater impact than just one organization and so we focus our innovations on Targeted Commercialization. Our team spins out core technology areas into standalone startups ready to build a team, raise capital, and launch a product/service that solves a critical challenge across entire market sectors in the materials & manufacturing space.

The Opportunity with Solvus Global Is...

Dynamic, Engaging, Cross-Disciplinary, Cutting-Edge, Flexible, EMPOWERING

Solvus Global is looking for a Senior Technical Program Manager who wants to bridge the gap between technology development and technology implementation. This individual will work directly with internal engineering staff and external customers to ensure that our team is delivering the best possible product that we can, exceeding the expectations of our partners and customers. This individual should have a strong technical background in materials, manufacturing, or mechanical engineering and ideally have a strong network to engage with in order to deliver optimal customer solutions. This person should be self-motivated and excited about interfacing with customers and delivering both technical and business value. The expectation is that this person should be able to wear many hats and enjoys working across various technology & industry sectors.

Required Attributes & Skills

- 5+ years of practical experience (or 2+ with PhD) in technical materials and/or manufacturing role
- 3+ years of program/project management
- Effective written and verbal communication
- Excellent organization
- Ability to work both independently and in a team
- High attention to detail

Advantageous Attributes & Skills

- Experience with agile work frameworks
- Experience managing and writing government proposals
- Strong knowledge of metal-based 3D printing methods
- Understanding of synergies between data and manufacturing
