Job Type:	Full Time, Hourly

At Solvus Global, We Are...

Innovators, Engineers, Entrepreneurs, Makers, Creators, Dreamers, DOERS

Solvus Global is a technology innovation start-up focused on solving problems in the materials and manufacturing space. We are a diverse team of engineers & scientists dedicated to leveraging our Knowledge Capital to develop critical solutions for our customers. Often, those solutions have much greater impact than just one organization and so we focus our innovations on Enterprise Solutions. Our team spins out core technology areas into standalone startups ready to build a team, raise capital, and launch a product/service that solves a critical challenge across entire market domains in materials & manufacturing.

The Opportunity with Solvus Global Is...

Dynamic, Engaging, Cross-Disciplinary, Cutting-Edge, Flexible, EMPOWERING

Solvus Global is currently looking for a full-time senior-level technician who will work side-by-side with our engineers and production specialists to support metal powder production for additive manufacturing. Responsibilities may include (1) manufacturing or processing metal powder, (2) tracking raw material inventory, (3) monitoring critical quality control metrics, (4) ensuring orders are fulfilled within allotted lead times and (5) establishing standard work protocols for various processes. This position will require the ability to quickly learn the cadence of operations to seamlessly begin supporting the team. As a senior-level member, the ideal candidate should be able to adapt to a changing working environment as the start-up grows and order volumes increase.

Required Attributes & Skills

- Ability to teach and work with a team
- Ability to take and give direction
- Technical mechanical or material expertise
- Expertise with common manual and power tools (“hands-on”)
- Expertise with machine operation and maintenance
- Attention to detail and ability to adapt to changing workspaces

Advantageous Attributes & Skills

- Experience with metal powder for additive manufacturing
- Inventory management experience
- Experience working in an ISO certified lab
- Six sigma certification or background in lean manufacturing
- Experience with project management
- Experience in shipping (specifically shipping of hazardous materials).
