## **At Solvus Global, We Are...**

### ***Innovators, Engineers, Entrepreneurs, Makers, Creators, Dreamers, DOERS***

Solvus Global is a technology innovation start-up focused on solving problems in the materials and manufacturing space. We are a diverse team of engineers & scientists dedicated to leveraging our Knowledge Capital to develop critical solutions for our customers. Often, those solutions have much greater impact than just one organization and so we focus our innovations on Enterprise Solutions. Our team spins out core technology areas into standalone startups ready to build a team, raise capital, and launch a product/service that solves a critical challenge across entire market domains in materials & manufacturing.

## **At Solvus Global, You Will...**

### ***Learn Diverse Skillsets, Lead Impactful Teams, Unlock Your Potential***

We are looking for a full-stack Software Engineer with C#/.NET experience to join a growing team working in a dynamic landscape around a new set of high-tech products in the manufacturing sector. We are seeking individuals to contribute to the building out of our fully integrated process monitoring and control systems for the additive manufacturing and aluminum recycling industries. We are offering an opportunity to break the mold of a big organization and join a team that is passionate about technology, impact, and innovation. As a Software Engineer with Solvus Global you will work with team members from many fields (mechanical, controls, software, data science etc.) to define the problem space, propose a solution, design the architecture, and support development of the final product.

### **REQUIRED QUALIFICATIONS**

- **Must be a US Person** according to [FAR22 CFR 120.15 - US Person](#)
- 3+ years' work experience doing OOP development
- 2+ years' work experience developing in C#/.NET
- Excellent written and verbal communication skills
- Strong background in product development cycle

### **PREFERRED QUALIFICATIONS**

- Bachelor's degree in Computer Science or similar field
- Experience with cloud services such as Azure or AWS
- Experience working with relational databases such as PostgreSQL
- Experience working with .NET 5/6, Blazor/Razor, Entity Framework, and LINQ
- Experience in Machine learning and/or data science
- An understanding of the business value of software in hard tech (e.g., manufacturing)
- Experience deploying software products in the 'hard-tech' and government worlds
- Experience with project management and customer interfacing
