Job Type:	Full Time, Hourly

At Solvus Global, We Are...

Innovators, Engineers, Entrepreneurs, Makers, Creators, Dreamers, DOERS

Solvus Global is a technology innovation start-up focused on solving problems in the materials and manufacturing space. We are a diverse team of engineers & scientists dedicated to leveraging our Knowledge Capital to develop critical solutions for our customers. Often, those solutions have much greater impact than just one organization and so we focus our innovations on Enterprise Solutions. Our team spins out core technology areas into standalone startups ready to build a team, raise capital, and launch a product/service that solves a critical challenge across entire market domains in materials & manufacturing.

The Opportunity with Solvus Global Is...

Dynamic, Engaging, Cross-Disciplinary, Cutting-Edge, Flexible, EMPOWERING

We are currently looking for a full-time technician who will work side-by-side with our engineers and researchers to support metal powder production for our innovative spinoff business, *Powders on Demand*. A day in this position will start with a quick review between team members of major goals for the day, then will involve moving into the lab to process orders for our customers. The tasks each day will fluctuate from processing and blending powder to packaging and shipping orders to maintaining inventory and performing quality control. This will be a fast-paced, dynamic role that requires excellent communication skills, a strong team drive, and an ability to work with your hands and use/learn new tools. The ability to communicate well orally and in written form is *critical* for this position. This position will be very much hands-on and will require quick decision making in order to achieve efficient execution of our objectives and customer orders.

Required Attributes & Skills

- Ability to work in a team
- Ability to take and give direction
- Technical mechanical or material experience
- Experience with common manual and power tools
- Experience with machine operation and maintenance
- Attention to detail and ability to get the job done

Advantageous Attributes & Skills

- Experience with metal powder for additive manufacturing
- Inventory management experience
- Quality control experience
- Equipment inspection experience
- Experience in shipping (specifically shipping of hazardous materials).
