Job Type:	Full time, Salaried, Exempt

At Solvus Global, We Are...

Innovators, Engineers, Entrepreneurs, Makers, Creators, Dreamers, DOERS

Solvus Global is a technology innovation company focused on solving problems in the materials and manufacturing space. We are a diverse team of engineers & scientists dedicated to leveraging our Knowledge Capital to develop critical solutions for our customers. Often, those solutions have much greater impact than just one organization and so we focus our innovations on Targeted Commercialization. Our team spins out core technology areas into standalone startups ready to build a team, raise capital, and launch a product/service that solves a critical challenge across entire market sectors in the materials & manufacturing space.

The Opportunity with Solvus Global Is...

Dynamic, Engaging, Cross-Disciplinary, Cutting-Edge, Flexible, EMPOWERING

Solvus Global is looking for a Quality Manager who wants to help our team execute and implement testing, inspections, and other various evaluation methods to ensure that Solvus Global's products adhere to both company and industry standards. This individual will work directly with internal engineering staff and external customers to ensure that our team is delivering the best possible product that we can, particularly focused on large format 3D printing technologies. This individual will be responsible for managing all quality related activities, which may include writing and maintaining standard work, drafting quality manuals, implementing procedures for calibrating equipment, maintaining documentation for ISO audits, as well as incorporating lean manufacturing practices and optimizing production flow.

This person should be self-motivated and capable of independently delivering value, but also leading teams and mentoring others in the lab. The expectation is that this person should be able to wear many hats and enjoys working across various technology & industry sectors.

Required Attributes & Skills

- Technical background in areas such as quality, manufacturing or industrial engineering
- Work experience *within* ISO certified space
- Writing and maintaining standard operating procedures (SOPs)
- Effective written and verbal communication
- Excellent organization and attention to detail
- Ability to lead and mentor others

Advantageous Attributes & Skills

- Experience in *obtaining/applying* for ISO certification of lab/manufacturing space
- Background in lean manufacturing
- Six sigma certification or similar
